FOCUSED ON **FILTRATION & SEPARATION**

Parker | Balston

ENGINEERING YOUR SUCCESS.

Parker Balston

Industrial & Specialty Filtration Products

Compressed Air/Gas Filters

Specialty Gas Sampling Filters

Air Preparation Units (FRLs)

Compressed Air Dryers

Compressed Air Microbial Testing Unit (CAMTU)

Compressed Air/Gas Vacuum Pump Filters Filters

Steam Filters

Drains, Gauges, & Other Accessories

High Pressure Nitrogen Generator Systems

The Parker Balston Advantage

Superior, Consistent Performance

Certified to ISO 9001, our quality management systems provide products that meet your filtration requirements and exceed your performance expectations. Our superior filter designs produce lower differential pressures and higher dirt-holding capacity. Offered in a variety of efficiencies, the media you select is sure to fit your filtration needs.

Custom OEM Product Capabilities

When you need a special filter for a unique application, our experts are ready to work with you. We will tailor a configuration to meet your needs from our wide variety of filter media. With our LEAN manufacturing process, we can produce specials in reasonable quantities, in a reasonable amount of time, at a reasonable price. Not only will this enhance the performance of your product, but it will benefit you with aftermarket sales of replacement elements.

Value-Added Services

Let us review your OEM product requirements and we'll save you money while providing flexible engineering, exceptional service, and a team focused on the OEM customer needs.

Industrial Filters

Balston coalescing, particulate, and adsorption filters, dryers, Filter-Regulator-Lubricator combination units, and compressed air accessories assure that clean compressed air is available for all your industrial applications.

Specialty Filters

Balston steam filters eliminate overall contamination, taste differences, and odors in food and beverage products and facilitate sterilization in both hospitals and pharmaceutical processing facilities.

Industrial Nitrogen Gas Generators

Parker Balston Nitrogen Generation Systems continuously produce high purity nitrogen from compressed air. This eliminates the inconvenience and high cost associated with cylinders, dewars, and bulk delivery and increases reliability of supply. A nitrogen generator offers long term price stability and insulates the user from uncontrollable vendor gas price increases, long term commitments, contracts, and tank rental fees. Standard features include high efficiency coalescing prefilters, activated carbon adsorption, and a nitrogen storage tank.

Custom Designs for the Oil & Gas Industry

We offer a wide variety of custom PSA and Membrane nitrogen systems. These systems can be built on skids, enclosed in standard ISO shipping containers or trailer mounted for portable installations. Turn key systems are available with compressors, air pre-treatment. Systems can be supplied with booster compressors to 5000 psig and flows as high as 3000 scfm.
