BF46036 KIT SET OF 2 FUEL FILTERS

Baldwin's BF46036 KIT Fuel Spin-on Kit includes a primary Fuel Spin-on with Open Port and a secondary Fuel Spin-on. The BF46036 KIT is designed to protect a variety of Ag-Chem, Challenger, Massey Ferguson and Gleaner equipment.

The filters in the BF46036 KIT feature anodized aluminum threads, which are stronger and more dimensionally stable than plastic threads that can shrink or swell with humidity changes, heat and other environmental factors. The primary fuel spin-on with open port is compatible with OE bowls and filter drains/sensors, while both the primary and secondary fit OE bases.
