

B40053

Lube Spin-on

NEW RELEASE

Along with the higher pressures and temperatures of modern truck engines comes the potential for more soot and other particulates to enter the oil. In response, Baldwin's new lube filter medias have been designed to remove and hold more and smaller sized contaminants. Use Baldwin filters with the new Highly Engineered Layered Media (HELM™), like the B40053, to ensure your engine gets the protection it needs.
